
TOWN PICK UP

The extension of school bus routes to include student pickup points within towns of the School Division is authorized by the Division, as possible. The Transportation Supervisor will establish pickup points on the basis of the following criteria:

1. The most central and convenient pickup points for town/village students.
2. Town/village pickup points which are considered safe for a bus stop.
3. The availability of existing bus routes entering and leaving the town such that factors around time and distance can be minimized.
4. Room on available bus routes.

Pickup points will be reviewed annually by the Transportation Supervisor. A current town/village pickup point map will be available for individual route drivers and their substitutes as relevant. A complete set of current town pickup point maps is to be filed within the Division Bus Route Manual in the Transportation Office.
